INSTALLATION TIPS

- 01
- Inspect all product prior to installation for any visible defects or unacceptable colour/shade variation. Claims are not accepted after installation.
- 02
- A 1/4” square-notched trowel is suggested for applying the thin-set.
- 03
- Before grouting, allow the mortar base to dry for 24 to 48 hours.
- 04
- The tiles can be cleaned with clear water and/or a neutral liquid cleaner. Apply the cleaning solution to the properly installed tile using a cloth mop or non-abrasive towel. Follow the application with a clear water rinse and wipe dry to prevent film formation.
- 05
- Sealing the tile is not recommended, and acid cleaning the tile may result in substantial harm to the product; therefore if either of these applications are performed it will specifically void the warranty.
- 06
- INSTALLATION OF RECTANGULAR TILES:  
Staggered space should be kept within 10cm to 15cm  
(For 10cm X 60cm, 15cm X 60cm, 20cm X60cm, 30cm X 60cm, and 47cm X120cm rectangular tiles)  
to compensate for the warpage of rectangular tiles.

Each different tiles series is produced to meet different performance requirements. For specific product technical performance, please request from **WIFI** sales team or their agent or distributor.

Colour Variations: Since the colour reproduction in this printed piece will vary from the actual tile colours, final selection should be made from tile samples. Colour, shade and glaze variations may exist due to the inherent characteristics of porcelain tile.
